EXTRACTION TECHNOLOGY

# DentalPRO Universal

Last Updated on 02.02.2022

Stand-alone dust extraction system for CAD/CAM dental milling machines.

BOFA's DentalPRO Universal stand-alone dust extraction system filters small particulates generated during the CAD/ CAM milling of dental implants. The unit has a high-efficiency two-stage filtration process which helps the workplace maintain a clean working environment.

The unit's high vacuum pump is brushless and designed for continuous running for long periods of time before requiring servicing. The bag filter has a large 18-litre capacity and the HEPA filter is very high efficiency.

## Technology

HEPA filter

ProTECT service plan

SureCHECK quality standard

## Key features of the DentalPRO Universal

**Digital speed control - for variable airflow rates**  
Standard

**High vacuum pump for effective capture from source**  
Standard

**Filters with long life and low replacement cost**  
Standard

**HEPA filtration**  
Standard

**Quiet in operation**  
Standard

**24V remote stop / start interface + override**  
Optional

**Auto sensing voltage (90-257v) for global use**  
Standard

**Brushless motor (for longer periods of time before servicing)**  
Standard

**High efficiency 5 layer large capacity easy change filter**  
Standard

**Filter full indicator**  
Standard

**Small footprint**  
Standard

**Filter signal**  
Optional
