PrintPRO 400 DS

PRINTING

Last Updated on 02.02.2022

Mid to high-end fume extraction system for dye-sublimation printers.

The PrintPRO 400 DS is BOFA's mid-range of fume extraction and filtration system. The PrintPRO 400 DS has been purposely designed to filter fumes generated from dye-sublimation printers. This extraction system combines extremely large filter capacity with high airflows and pressure. This combination makes it ideal for heavy-duty applications. This system benefits from automatic flow control, which enables the end-user to set the required airflow for the application. The unit will then maintain this airflow throughout the life cycle of the filters.

The additional feature of BOFA's 'easi-glide' filter location mechanism makes filter change easy, quick and safe. A truly state of the art fume purification solution.

Technology

HEPA filter

Automatic flow control (AFC) technology

Reverse flow air (RFA) technology

Advanced carbon filter (ACF) technology

ProTECT service plan

SureCHECK quality standard

Key features of the PrintPRO 400 DS

Hydrophobic HEPA filters

Standard

Filters with long life and low replacement cost

Standard

Automatic fluid drain

Standard

VOC gas sensor (Volatile Organic Compound)

Optional

Filter change / system fail signal

Optional

Turbines with high airflow and pressure

Standard

Automatic flow control system

Standard

Fluid collection tray

Standard

Remote stop / start interface

Optional

Technical specification

1. Unit / filter condition display - automatic flow control

2. On / off isolator switch

3. Signal / interface cable

4. Power cable

5. Castors

6. Door hinge

7. Hose inlet connections - 125mm

8. Exhaust outlet

Where applicable, the carbon used in BOFA units is capable of removing a wide range of VOCs, however it is the responsibility of the user to ensure the carbon is suitable for their application. For specific applications, please contact us for details.

Important Notice: *Many factors beyond the control of BOFA can affect the use and performance of BOFA products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.*
